

Job Posting

Fire Assay Technician

In the Fire Assay Department, samples are fused and cupeled in high-temperature furnaces. Technicians are required to load and unload these furnaces with samples requiring physical strength and dexterity in a high-heat environment. As well, maintaining organization of samples and cleanliness of the work space are essential to success in this position.

Requirements

- Ability to lift 25 pounds and perform work in a hot environment.
- Shift work as required by a 24/7 operation (42 hours per week average).
- Attention to detail while performing a repetitive task.
- Manual dexterity.
- Experience is an asset but not necessary. On-the-job training can be provided.
