

Job Posting

Sample Prep Technician

Sample preparation is the process of preparing samples for analysis. Typically this involves the crushing and pulverizing of rock samples. This is physically demanding work requiring the lifting of heavy objects, operating jaw crushers and pulverizers as well as performing other related tasks. Successful candidates will be reliable individuals with an energetic attitude capable of the physical demands of the job. This is an entry level position and those who excel in it are often promoted quickly.

Requirements

- Operating bench-top machinery while standing for an 8 hour shift
- Regular lifting of heavy objects
- Shift work as required by a 24/7 operation (40 hours per week)
- Attention to detail while performing a repetitive task
- Secondary School Diploma
